Patient: TREADWELL, JAMES N

Specimen #: 504-7206
Accessioned: 05/26/04

Pathologist: J.B. [REDACTED], LCDR MC USNR
ADDENDUM

SPECIMEN:

- A: L FRONTAL TUMOR B: L FRONTAL TUMOR C: L FRONTAL TUMOR
- D: L FRONTAL TUMOR E: L FRONTAL TUMOR F: L FRONTAL TUMOR

-****

FINAL DIAGNOSIS:

- A) BRAIN BIOPSY, LEFT FRONTAL LOBE TUMOR:
 - RESIDUAL GLIOBLASTOMA MULTIFORME (WHO GRADE IV).
 - BIOPSY SITE CHANGES.
- B) BRAIN BIOPSY, LEFT FRONTAL LOBE:
 - BENIGN BRAIN TISSUE; NO TUMOR IDENTIFIED.
- C) BRAIN BIOPSY, LEFT FRONTAL LOBE:
 - BENIGN BRAIN TISSUE; NO TUMOR IDENTIFIED.
- D) BRAIN BIOPSY, LEFT FRONTAL LOBE:
 - BENIGN BRAIN TISSUE ; NO TUMOR IDENTIFIED.
- E) BRAIN BIOPSY, LEFT FRONTAL LOBE:
 - BENIGN BRAIN TISSUE; NO TUMOR IDENTIFIED.
- F) BRAIN BIOPSY, LEFT FRONTAL LOBE TUMOR:
 - RESIDUAL GLIOBLASTOMA MULTIFORME (WHO GRADE IV).
 - BIOPSY SITE CHANGES.

COMMENT:

The patient's prior left frontal lobe mass biopsy (S04-5700 A) showing a glioblastoma multiforme was reviewed. The current submitted brain biopsies, part A (left frontal lobe tumor submitted for frozen section) and part F (left frontal lobe tumor submitted as permanent specimen) show residual high-grade astrocytic neoplasm consistent with glioblastoma multiforme (WHO grade IV). The remainder of the specimens currently submitted demonstrate benign cerebral tissue with some reactive gliosis. Recommend correlation with clinical, radiographic and intraoperative findings.

Dr. G [REDACTED] discussed this case with Dr. S [REDACTED] on 2JUN04.

CoPath Report (Cont'd)
GPG/dmp

GROSS DESCRIPTION:

A) The specimen is received fresh, labeled with the patient's name, "Treadwell," designated "left frontal tumor," and consists of an irregular single portion of soft tissue measuring 0.3 cm. The specimen is entirely submitted for frozen section examination. The specimen is transferred to cassette A1 frozen. TE/1/1.

B) The specimen is received fresh, labeled with the patient's name, "Treadwell," designated "left frontal tumor," and consists of a single irregular portion of soft tissue measuring 0.4 cm. It is submitted entirely for frozen section examination. The specimen is transferred to cassette B1 frozen. TE/1.

C) The specimen is received fresh, labeled with the patient's name, "Treadwell," designated "left frontal tumor," and consists of a single irregular portion of soft tissue measuring 0.2 cm. It is entirely submitted for frozen section examination. The specimen is transferred to cassette C1 frozen. TE/1.

D) The specimen is received fresh, labeled with the patient's name, "Treadwell," designated "left frontal tumor," and consists of a single irregular portion of soft tissue measuring 0.4 cm. It is entirely submitted for frozen section examination. The specimen is transferred to cassette D1 frozen. TE/1.

E) The specimen is received fresh, labeled with the patient's name, "Treadwell," designated "left frontal tumor," and consists of a 0.4 cm pink-tan portion of soft tissue entirely submitted for frozen section examination. The specimen is transferred entirely to cassette E1 frozen. TE/1.

F) The specimen is received in formalin, labeled with the patient's name, "Treadwell," designated "left frontal tumor," and consists of a single

unoriented and irregular round portion of soft tissue measuring 1.0 x 0.8 x 0.4 cm. TTE/3/1. maf MAF/dmp
